

# Using the **pit bull** Rear Stand for Honda VFR1200F

See reverse side for warnings:

- This stand is designed specifically for the 2010 VFR1200F without an O.E. center stand attached. It lifts the VFR using the O.E. center stand bracket.
- It is used on the left side of the bike for wheel removal. The handle of the Pit Bull Rear Stand faces the rear of the bike.
- **Operation:** With the bike on the side stand, insert the pin into the center stand brackets. With your right hand, use grab rail to stand the bike up vertically. When the bike is vertical, use your left hand to push down on the stand while simultaneously pulling up on the passenger grab rail with your right hand.
- For added safety, insert a locking pin through hole near the tip of the structural pin. Make sure the hole in the structural pin is oriented correctly. To rotate the structural pin, insert screwdriver into the hole and turn the screw using a 5mm hex (allen) wrench.
- Refer to Manufacturer's service manual for detailed wheel removal/replacement procedures.

## Warnings for using **pit bull** VFR 1200 Rear Stand:

- Do not sit on the motorcycle while motorcycle is supported by the stand.
- Do not start the motorcycle while motorcycle is supported by the stand.
- Do not strap the motorcycle down while motorcycle is supported by the stand.
- Avoid prolonged exposure to salt(including salty air) and/or harsh chemicals as they might harmfully affect the stand's corrosion resistance.
