

Using the Pit Bull Helmet Holder(US Patent 12,381,011)

The Pit Bull Helmet Holder can be mounted in either your home, garage, or transport vehicle using the provided screws or your own screws for your particular application.

Before Installation: Ensure that the mounting screws you select are the appropriate length for your mounting location and surface. We provide 2" screws as a courtesy but they may not be right for your needs based on wall thickness and/or other factors.

NOTE: If you plan to mount your leathers via the optional Hanger adapter, ensure that you mount the device high enough for your leathers to clear the ground below.

Install the cradles as shown in the image to the right. When installed correctly, they will cradle the helmet from 4 directions.

Once the Helmet Holder is securely installed, you can use the knobs to adjust the cradles to the appropriate position for your helmet. Ensure that the back of the helmet has ample clearance so it will not rub against the wall during transport and/or installing/removing the helmet from the holder.

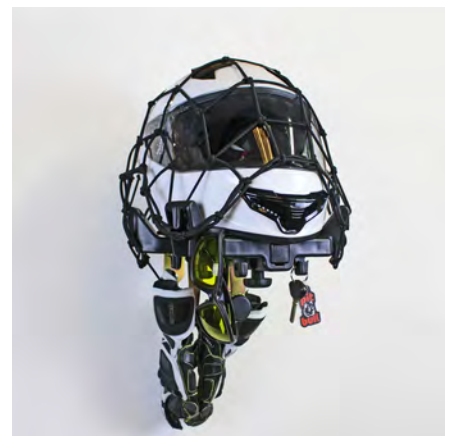

If securing the helmet via the chin strap, use sufficient tension to prevent movement of the helmet during transport. If using the optional cargo net, pull the cargo net down as much as possible for sufficient tension to retain the helmet in the holder. Failure to secure the helmet with proper tension could result in damage to the helmet if it falls.

The small hooks on the Helmet Holder cradles are provided for hanging your keys and the hole located just outward(from center) can be used to hang your sunglasses or riding glasses.

The optional gloves holder and hanger mount add-on can be used to secure your riding gloves and jacket or leathers.

The small hooks on the Helmet Holder cradles are provided for hanging your keys and the hole located just outward(from center) can be used to hang your sunglasses or riding glasses.

The Helmet Holder was designed to fit all sizes and many different types of helmets. If it does not fit your size and/or type, please contact us and we may be able to help.

Helmet Holder, Basic Kit includes:

2 x adjustable cradles with integrated hooks for keys and riding glasses
